THE KOKOMO ORNAMENTAL FENCE. INDIANA.

KOKOMO,

TWENTIETH ILLUSTRATED CATALOGUE OF
ORNAMENTAL FENCE

Manufactured by
Kokomo Steel & Wire Co.
Kokomo, Indiana, U. S. A.

INTRODUCTORY

RESIDENCE OF G. BULLE, HAVANA, CUBA

We are presenting you our illustrated Catalogue of Ornamental Fencing, with the illustrations and information arranged in such a manner that you can easily arrive at the height, weight, etc., of our fencing.

If you have ever purchased Kokomo Ornamental Fencing, it will be useless for us to make any statement other than to say we are maintaining our high standard of quality and excellency. If you are contemplating the purchase of an ornamental fence, don't make the fatal mistake of purchasing some other make, when you can get a Kokomo Ornamental Fence at a price so low, you will be surprised when you consider the value you receive.

KOKOMO STEEL & WIRE CO., Kokomo, Ind., U. S. A.

Kokomo Ornamental Fence

Kinds of Fence

We manufacture two kinds of complete ornamental fencing i. e., our Standard and Junior Fencing, our Junior Fence being the equal of any ornamental fencing made today, while our Standard Fence is superior to any other make of ornamental fencing on account of its being made of heavier material. In both of these fences we furnish our regular make of posts with cast iron bases, the only difference being in the size of the tubing used in the line posts and line railing. Either our Standard or Junior styles of complete fencing can be made with the spear point or ball ornaments with the braided wire, or with the malleable iron cresting. Below we give you the size of material used.

Specifications Standard Fence

Corner Posts	$1\frac{3}{4}$	Inch Steel Tubing
End Posts	$1\frac{3}{4}$	" " "
Gate Posts	$1\frac{3}{4}$	" " "
Line Posts	$1\frac{3}{4}$	" " "
Line Railing	$1\frac{3}{8}$	" " "

Specifications Junior Fence

Corner Posts	$1\frac{3}{4}$	Inch Steel Tubing
End Posts	$1\frac{3}{4}$	" " "
Gate Posts	$1\frac{3}{4}$	" " "
Line Posts	$1\frac{3}{8}$	" " "
Line Railing	$1\frac{1}{8}$	" " "

We can furnish $2\frac{1}{2}$ inch Corner End and Gate Posts for our Standard Fence only, at an additional charge of \$1.50 each extra.

Either our Standard or Junior Fences can be fitted with Style A, B, C, E, F, G and H Fabric. This gives you a selection of 44 different styles of complete fencing, and 7 different styles of fabric for erection on wood posts.

MATERIAL

The material used in the construction of our ornamental Fencing is the best that men and machinery can make and that money can buy, every particle of the material being subjected to the most critical and painstaking inspection to see that it is worthy of being used in our Kokomo Ornamental Fencing, on which we have built up a reputation that has enabled us to become the largest manufacturers of Ornamental Fencing in the United States.

WORKMANSHIP

It is just as difficult to fit an Ornamental Fence to a certain piece of ground as it is to fit a suit of clothes to a man's body. Hence it is necessary to employ mechanics who are skilled in this particular line of work, and we desire to say to you that the different parts of our fencing fit and join together as perfectly as though they were oiled, because our workmanship is unexcelled.

CONSTRUCTION

In the construction of our Ornamental Fencing we first considered the post and the necessity of securing lasting qualities. Also that the posts must be held in perfect alignment. This result we secured by our manner of attaching the line railing to the corner end and gate posts, as well as line posts, and also the grade and quality of our connections, which also serve as ornaments.

POSTS

It is the post that gives life to your fence, and realizing after years of experimenting that cast iron was the only metal you could place in the ground that would resist rust and the action of the elements at the surface of the ground we began the manufacture of the post shown at the left of this page.

The upper portion of this post is made of steel tubing and upon the end of this steel tubing is wrought our heavy cast iron base, which extends up and around the tubing in such a manner that a solid ring of cast metal is interposed between the ground and steel tubing which makes it impossible for the tubing to come in contact with the ground and as the joint where the cast iron base and tubing come together is absolutely water-proof we can guarantee our posts for a life time.

Notice the ring of cast metal at the base of the post. That is the secret of their durability

Posts are spaced seven feet apart.

FABRICS

We manufacture seven different designs of fabrics so that you have a selection from which the most exacting person can make a satisfactory choice. Our fabrics are all made of double galvanized wire that we know is good, because we make it ourselves. Our pickets all run the full width of the fence and every design or style is fitted with our patent interlocked top which makes it impossible to bend the top of the fabric out of alignment and also owing to the peculiar manner in which the pickets are interwoven the fabric will not sag between the posts.

SPECIFICATIONS OF FABRICS

Styles A, B, E and F.

Pickets 2 No. 11 Wires Twisted.

Cables 2 No. 12 Wires Twisted.

Style G.

Pickets 1 No. 9 Wire Single.

Cables 2 No. 12 Wires Twisted.

Styles C and H.

Pickets 2 No. 13 Wires Twisted.

Cables 2 No. 12½ Wires Twisted

LINE RAILING

Our line railing as well as tubing in the posts are all made of the best Seamless Steel Tubing manufactured, and when put into our Kokomo Ornamental Fencing it is coupled up in full lengths and securely attached to the corner end and gate posts, passing through the ornaments of the line posts, so that the line railing and posts together form a perfect frame, to which our fabrics are attached.

ORNAMENTS AND CONNECTIONS

Spear Point Ornaments are made from malleable iron, and on account of their design make the fence very neat and artistic.

Ball Ornaments are made from heavy grey iron, and while giving the fence a solid and massive appearance, it still retains the proper proportion.

Ornamental Cresting is made from tough malleable iron, and serves as a protection to the fence, as well as an ornament. There is no danger of it being broken when made from this grade of material.

Fittings are all malleable iron, which insures them against breakage.

FINISH

Our Posts and Line Railings are finished in black, while the Post Ornaments and Railing Sleeves can be finished in black, or silver bronze, and in the event you fail to specify we will make the ornaments silver bronze. Malleable cresting is finished in black.

TUBULAR STEEL FENCES FOR LAWNS, BOULEVARDS AND CEMETERIES

Are made with our standard specifications of posts and tubing and the same care is observed in its construction as in our other fences. They are fully described as Style "D" and "J" on pages 32 and 33 of this Catalogue.

When Ordering or Writing

RESIDENCE OF C. G. RAUB, MERIDIAN, CAL.

In ordering Kokomo Ornamental Fence, or when writing for prices, be sure and send us a diagram of the ground you wish to enclose, showing the exact number of feet you desire, also the exact location and size of the gates and if gates wanted are single or double. The proper way is to give the measurement from the corner post or end post as the case may be, to the center of the gate, then state the width of the opening in which you desire the gate to swing, then give measurement from the center of the gate to the next corner or end post as the case may be, and so on until the exact measurements of all the different parts of the fence are given. Always specify the style and height of the fabric, also if you desire Standard or Junior Fence. In writing please state whether you want the spear or ball ornaments, or the malleable cresting, and advise the page on which we illustrate the fence you like best. We are always glad to furnish you estimates on as many different heights and styles as you desire.

NAME AND ADDRESS

Be sure and sign your name and give your post-office address on every letter, so there will be no delay in answering same.

ERECTION OF KOKOMO ORNAMENTAL FENCING

It does not require a mechanic to erect our fence; in fact the main thing is to set the posts in a perfect line, then with the complete instructions we give and the manner in which we mark the different parts before making shipment any one can erect the fence without any difficulty whatever.

GUARANTEE

A guarantee of quality and excellency backed up by a responsible manufacturer is probably the most effective manner of securing the confidence of the people, and we make this statement in regard to our goods, knowing that we are in position to back it up. "We guarantee every foot of our fencing to be satisfactory" a strong statement, but we can deliver the goods.

OUR RESPONSIBILITY

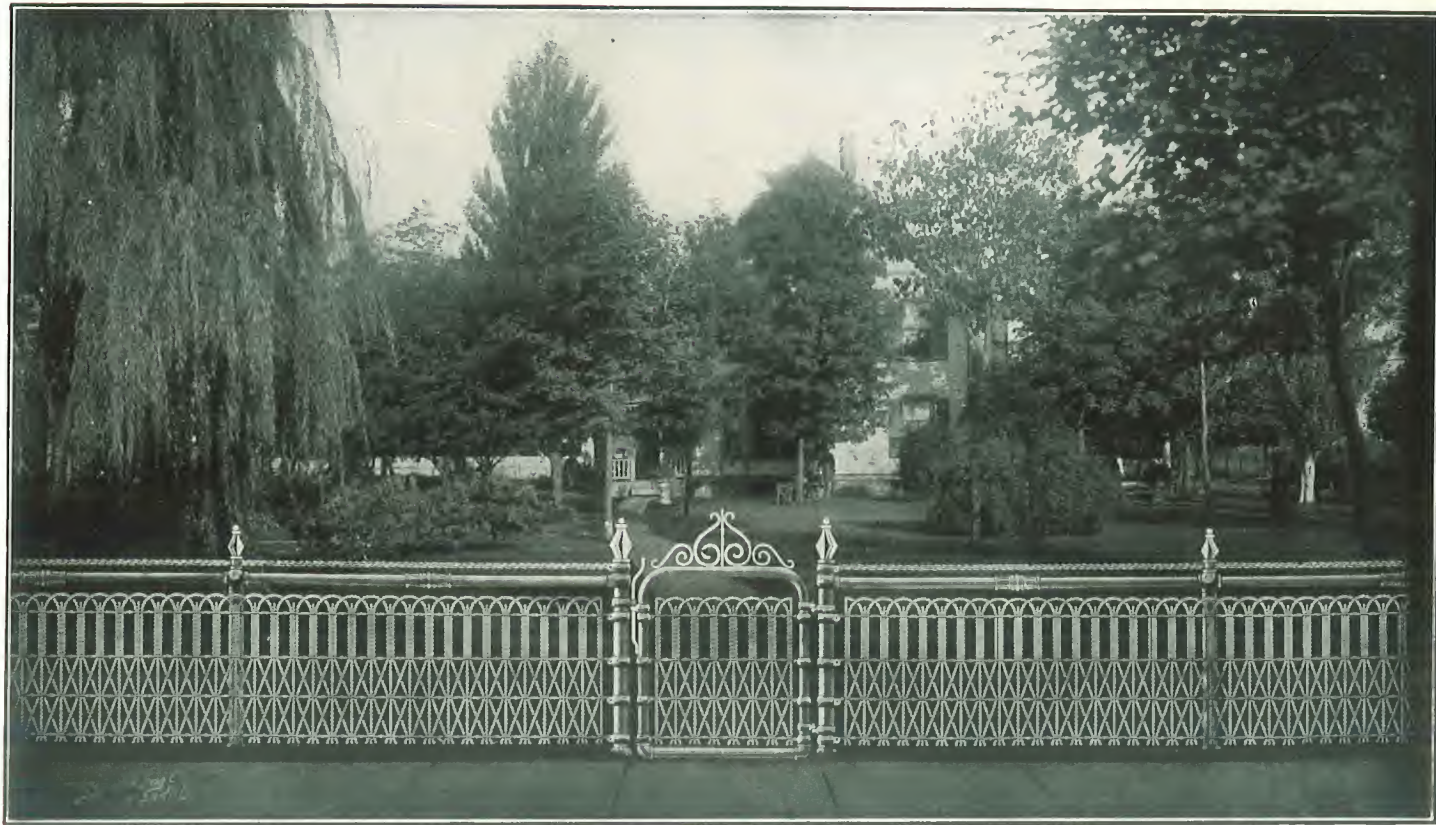

We are pleased to refer you to the Citizens National Bank, Howard National Bank, Farmers Trust & Savings Bank, Wells Fargo, National, American and Adams Express Companies, or Postmaster, all of Kokomo, Indiana, or Dun and Bradstreet's Commercial Agencies. In writing to any of our references be sure to enclose stamps for reply.

TERMS

Our terms are cash or 30 per cent, with order, with goods shipped to ourselves, with sight draft and bill of lading sent to your nearest bank for the balance, unless satisfactory arrangements can be made for credit.

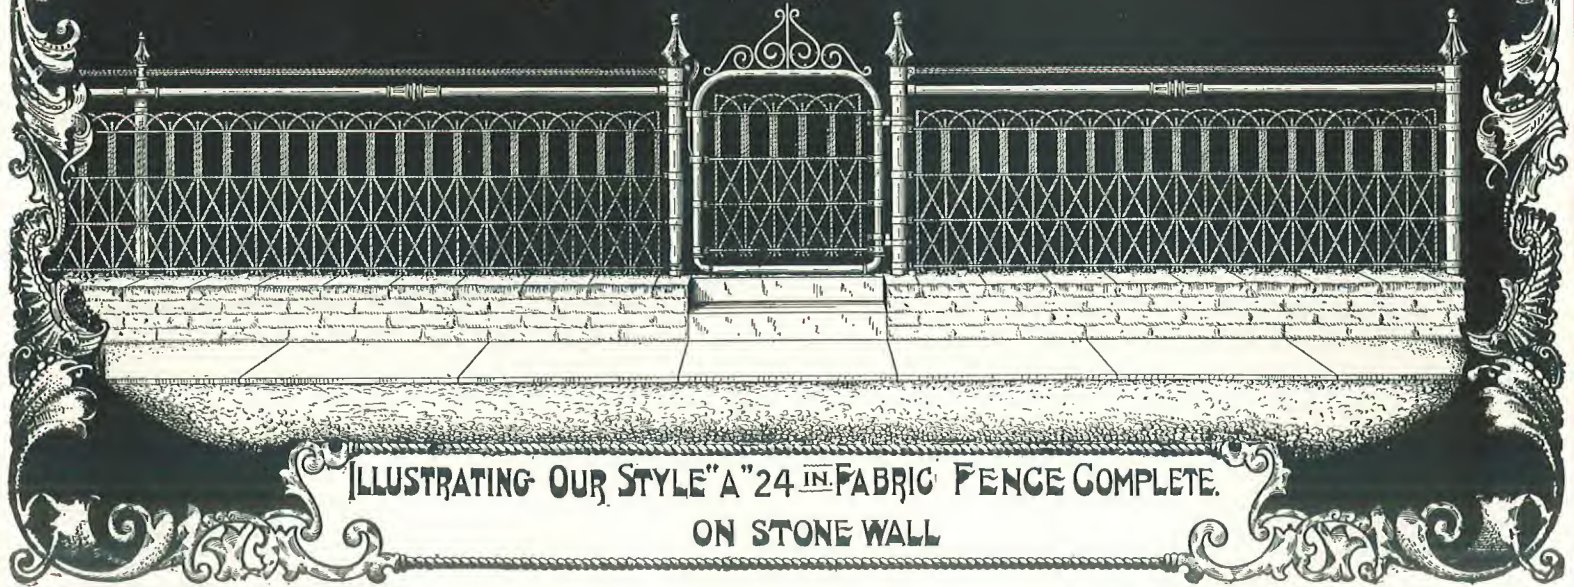

REMITTANCES

Make all remittances to Kokomo Steel & Wire Co., by New York, Chicago or Cincinnati Draft, Express or Postal Money Orders or Registered letter. Do not send individual checks, unless 25 cents is added for Exchange

A Typical Southern Home, inclosed with our complete fence, fitted with Style A, 24-in. Fabric.
See pages 24 and 25 for price.

Illustrating our Style D, tubular steel fence for lawns, boulevards, cemeteries, etc., made with 1, 2 or 3 rails as desired, height ranging from 24 to 48 inches.

Price, Style D, 30-in. high, 1 rail, Standard fence with ornaments complete, 56 cents per foot.	Weight per foot 5.8 lbs.
Price, Style D, 36-in. high, 2 rail, Standard fence with ornaments complete, 66 cents per foot.	Weight per foot 8.8 lbs.
Price, Style D, 48-in. high, 3 rail, Standard fence with ornaments complete, 76 cents per foot.	Weight per foot 10 5 lbs.

Size of posts and rails same as standard fence. (See Page 3).

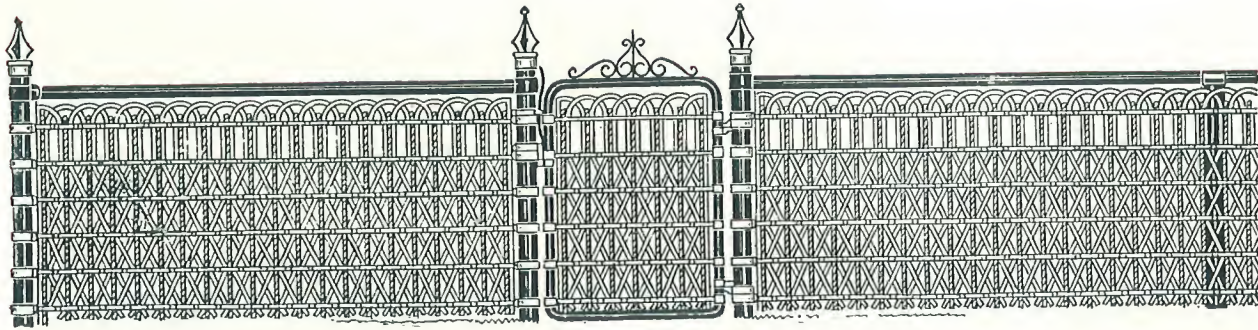

STYLE J—CEMETERY AND LAWN FENCE. Answers in every respect to the description of our Boulevard fences, except in finish and ornamentation; the railing and posts are furnished in black, chain and ornaments in silver bronze.

Price 1 rail and chain, with silver bronzed ornaments, \$.72 per foot.	Weight per foot. 7. lbs.
Price 2 rail and chain, with silver bronzed ornaments, \$.82 per foot.	Weight per foot, 9.2 lbs.
Price 3 rail and chain, with silver bronzed ornaments, \$.90 per foot.	Weight per foot, 12.3 lbs.

Aluminum name plate \$4.00 extra.

Size of posts and rails same as Standard fence. (See page 3)

OUR "CHAMPION" LAWN FENCE

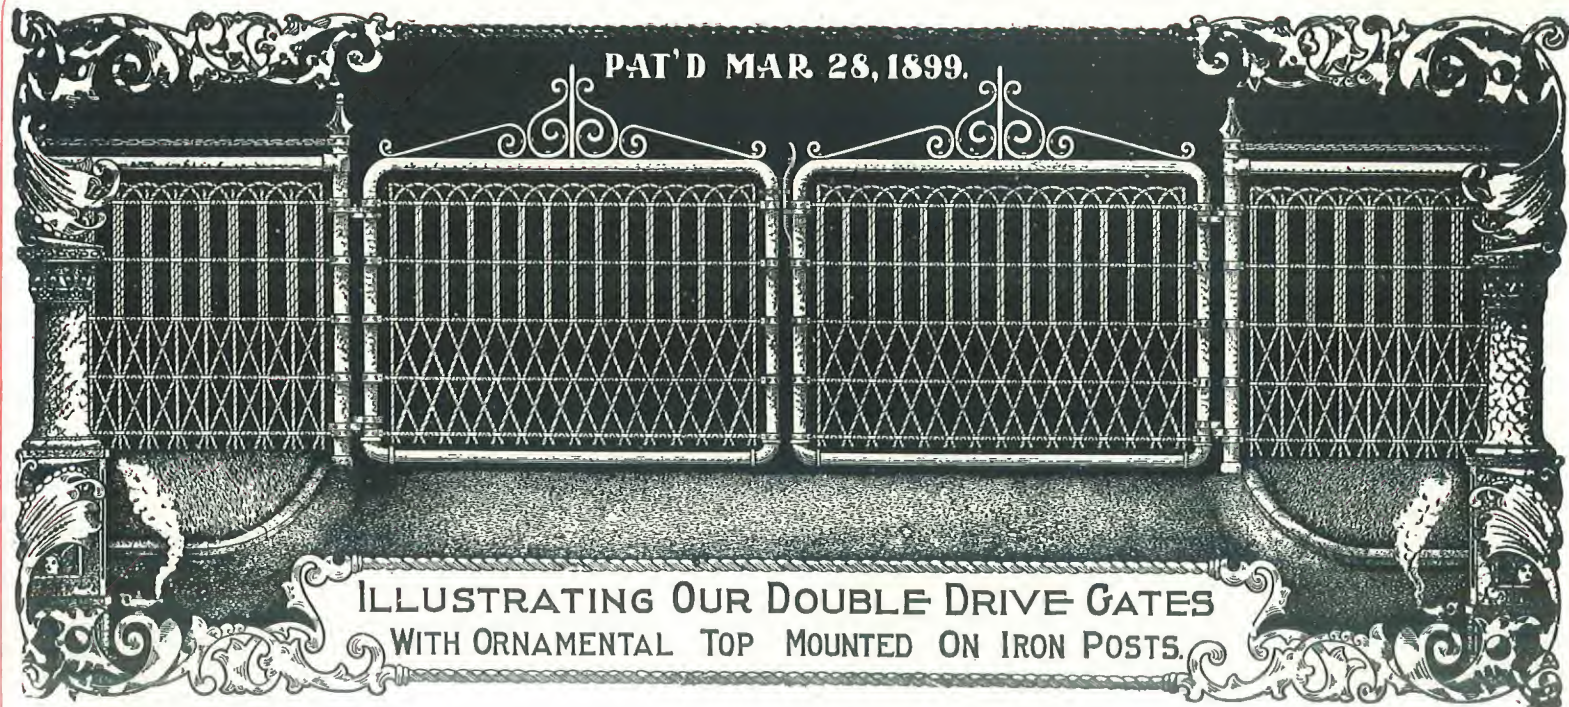

Our "Champion" Complete Lawn Fence, is made from $1\frac{3}{4}$ inch outside diameter double strength steel tubing for corner, end and gate posts; line posts are $1\frac{3}{8}$ inch outside diameter, and line rail $1\frac{1}{8}$ inch outside diameter. Each post is fitted with our special rust resisting base, as shown on page 5 of our catalogue. Line posts will be spaced 7 feet apart or as near that as the sections will evenly divide.

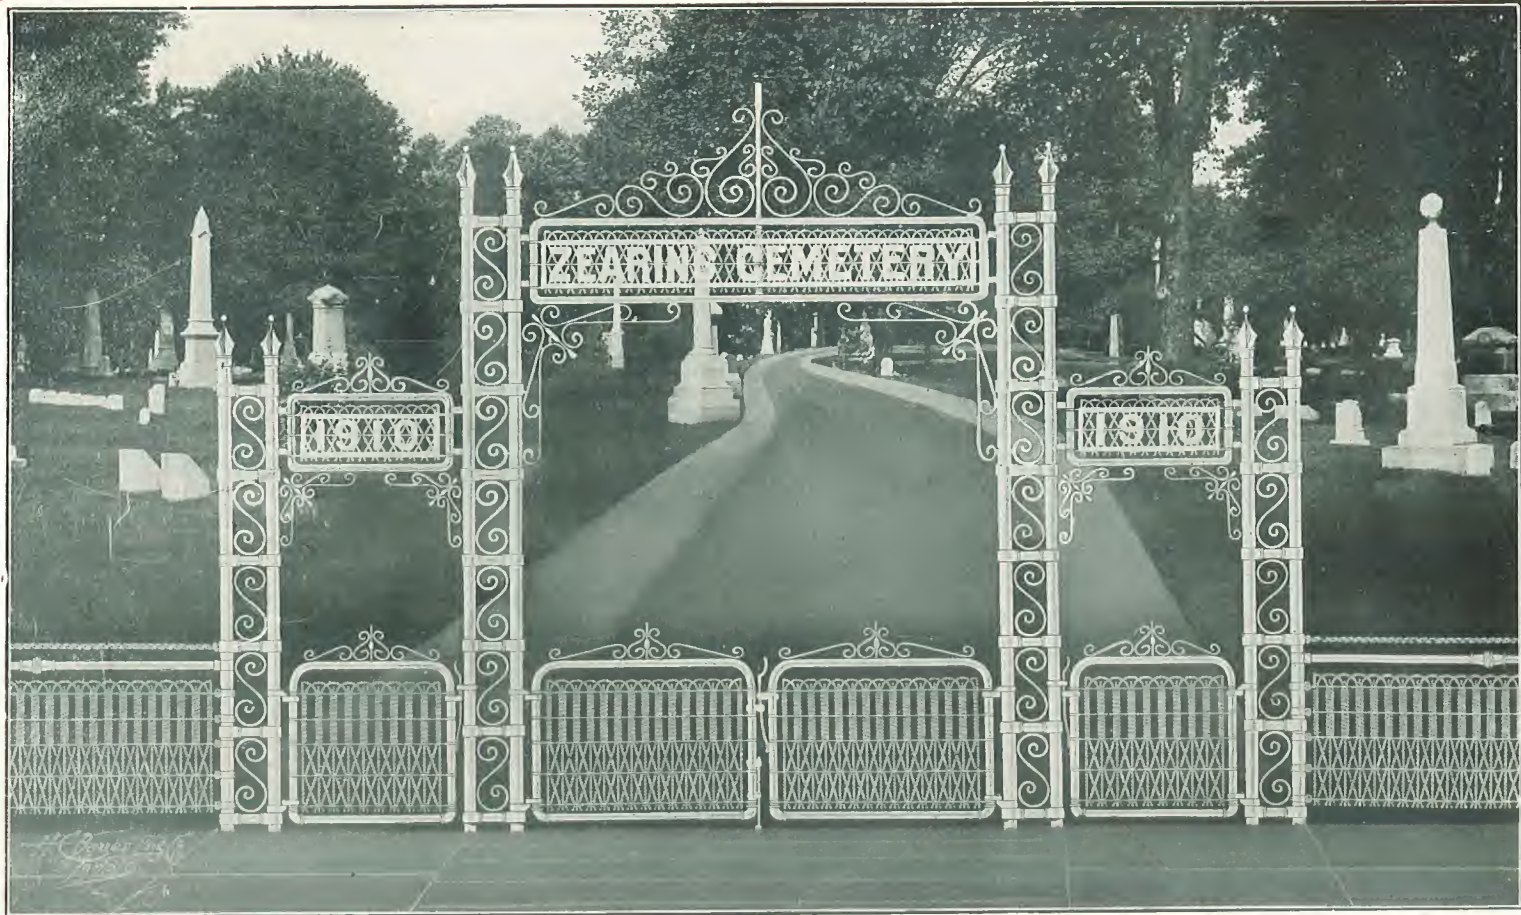

The fabric is made from No. 9 galvanized wire for the bow top pickets, No. $11\frac{1}{2}$ galvanized wire for the intermediate twisted pickets, and No. $12\frac{1}{2}$ galvanized wire for the line wires or cables. The fabric is woven so that it cannot be bent out of position at the top, also with a very close spacing at the bottom, making it absolutely poultry proof.

All fittings are made from heavy malleable iron; they won't break.

STANDARD ORNAMENTAL ARCH FOR PARK AND CEMETERY FENCE

See description and price on page 42

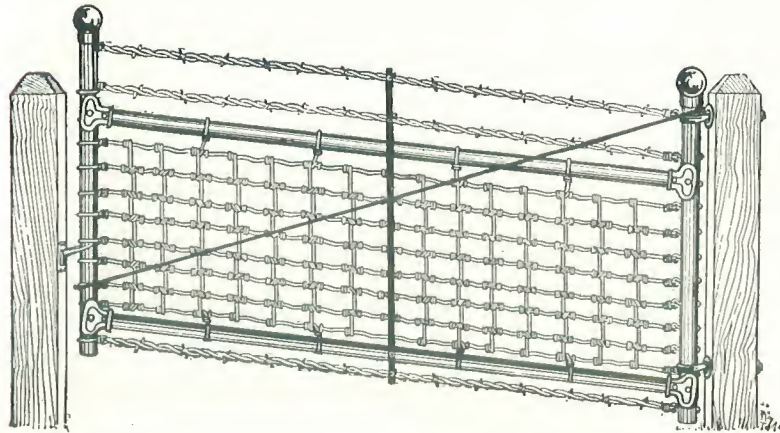

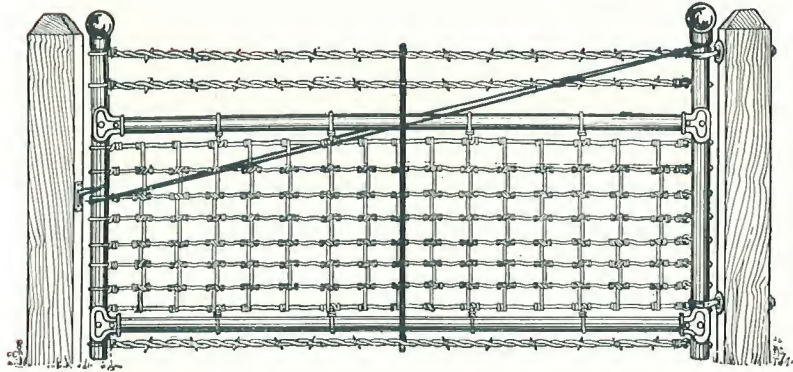

OUR KOKOMO ARCH FOR WALKS, GATES, DRIVEWAYS, ETC. There being a demand for a less elaborate and cheaper arch than our Standard Cemetery and Park Arch, we designed the Kokomo, that this demand might be supplied with a good strong and handsome arch at a reasonable price.

Weight complete about 500 lbs.

See description and price on page 42.

KOKOMO "PIONEER LIFT GATE"

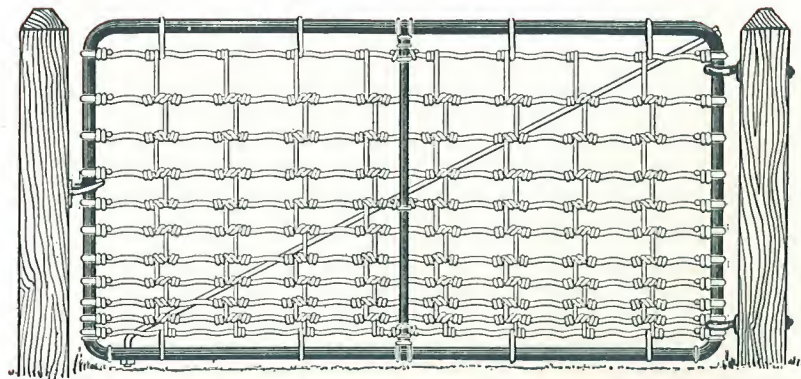

In offering our Pioneer Lift Gate to our customers we do so knowing it has been manufactured following the ideas of practical farmers. Men who have used gates for years, who know by actual experience where the greatest strain comes on a gate, and what it should do in the way of operation to make it a help in their work, instead of a backbreaker. The above information combined with our knowledge of the proper kinds of material to use, has enabled us to produce our Pioneer Lift Gate, that will work as it should, Summer or Winter, and stand the test of time.

For the frame, we use double strength steel tubing $1\frac{5}{8}$ " outside diameter. The center brace is made from two pieces of 1 inch flat iron, bolted on each side of the heavy fence filler and barbs. These gates are filled with all No. 9 galvanized farm fence with stays spaced 6 inches apart. Each line wire in the fence is stretched with a $\frac{1}{4}$ inch eyebolt, which passes through the frame of the gate, with a nut on the outside, allowing for adjustments at any time. Corner clamps are made from heavy malleable iron. Latch end can be raised from 6 inches to 30 inches, hinge end about 8 inches (See lower illustration). This raising feature allows the gate to swing over snow drifts, also permits the smaller stock, such as hogs and sheep to pass in under at the same fencing against the larger stock. The gate is raised and lowered by $\frac{5}{16}$ " steel rod. With these gates we furnish an automatic latch and one top chain, also $\frac{5}{8}$ " steel eye bolt hinges made with 10" shank, threaded 4 inches on end with nut and washer. These gates are painted bright red, with a paint that is guaranteed as to quality. The top ball ornaments are finished in silver bronze.

	Standard height 54"	Weight	Price
10'	100 lbs.	\$ 8.00
12'	113 lbs.	9.00
14'	126 lbs.	10.00
16'	139 lbs.	11.00

Extra center brace 50c. net. Size given is opening between posts.

KOKOMO FARM GATES

Kokomo Farm Gate

To meet the demands for a low priced substantial farm gate, we offer you our Kokomo Farm Gate, as illustrated. Specifications as follows:

Frame..... $1\frac{3}{8}$ " steel tubing
Center brace..... $1\frac{1}{2}$ " steel tubing

ARCHES

The posts in our arches are made from double strength steel tubing, 1¾" in diameter, but we can furnish same 2½" if desired. The posts are fitted with a special set base the same as shown on page 43. This base sets in the ground to sufficient depth so that the arches are very solid and perfect in alignment. We also furnish two iron braces which connect to the arch at the top and then to a plate buried in the ground back of the arch. The scroll work is of heavy wrought iron. The lettering is made from galvanized iron and silver bronzed. The arches stand 12 feet high in the clear (from the ground to the bottom of the inscription.)

OUR HITCHING POST

Our Hitching Post is made from steel tubing $2\frac{1}{2}$ inches in diameter and is fitted with an anchor that is used in our extra heavy ornamental post. The top is a large handsome ball with an opening in the upper end through which a disappearing chain, same as shown in cut, is placed. This is the most convenient hitching rack yet devised. The chain is not broken or torn off as is usually the case, but is always at hand when wanted.

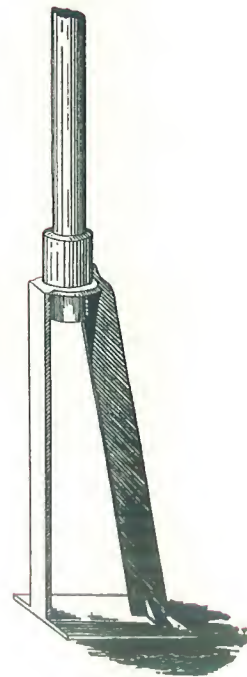

Price \$3.00

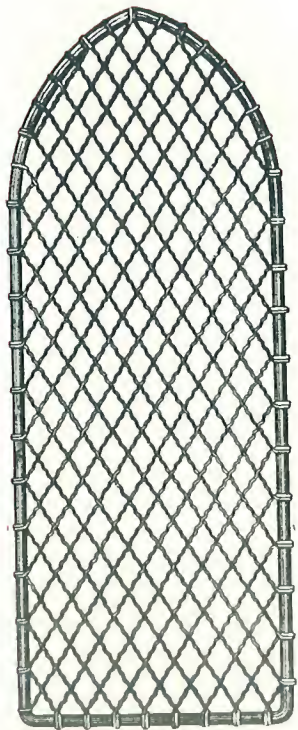

OUR SPECIAL SET POST

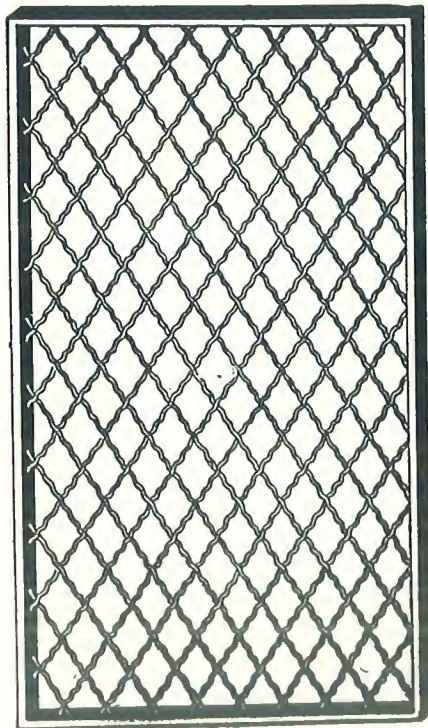

Can be furnished with any of our fences when preferred. An additional charge of 40 cents for each post will be made.

NOTE—If wanted always specify special set post.

GENERAL INFORMATION

We extend a thirty day credit to responsible people.

Posts are spaced seven feet apart.

Read description of posts on page 5.

Fabric can only be made in heights shown on pages 40, 41 and 42.

Any of our fences can be made to be erected on brick, stone or cement wall. For fence to be erected in this manner, we leave off the iron base, and cut the steel tubing in the posts so they can be set in the wall ten inches, and then made secure by using cement or lead. We make a special deduction for this style of fence. See page 12.

We make our own special double galvanized wire, which is used in the manufacture of our fabrics, and we know it will give satisfaction.

Note size of posts and rails used in our Standard and Junior fences on page 3, and see full descriptions of our different styles of fabrics on pages 40, 41 and 42. Also description of ornaments and fittings on page 6.

All measurements given are outside diameter.

The complete fence, with braided wire, is $7\frac{1}{2}$ inches higher than the fabric with which it is filled, and the complete fencing with malleable iron cresting is $9\frac{1}{2}$ inches higher than the fabric with which it is filled.

The fabric and line rail will be cut to fit each section.

We send complete directions for erecting our fence.

When writing for prices, always send measurements, as requested on page 7.

If everything is not clear to you, do not hesitate to write us for we are glad to give any information desired.
